

# Required For HERS Ratings in Massachusetts

**Customer agrees to do the following crucial steps at a minimum in order to increase the chances of a successful HERS Rating score:**

- Engage with us before construction begins.
- Provide Energy Geeks with a set of building plans with sufficient detail.
- Provide us with a copy of your building permit.
- Follow the Projected HERS Certificate provided by Energy Geeks for your project.
- Provide proposals so that we can review before you purchase and or install for the following subcontractors: (Insulation contractor, HVAC Contractor).
- Provide a cut sheet for the windows being used for the project before purchasing.
- Provide a model number for the ERV (energy recovery ventilation) being used for the project before purchasing.
- Provide model numbers for the kitchen appliances including clothes washer and dryer before purchasing.
- Provide additional information upon request.
